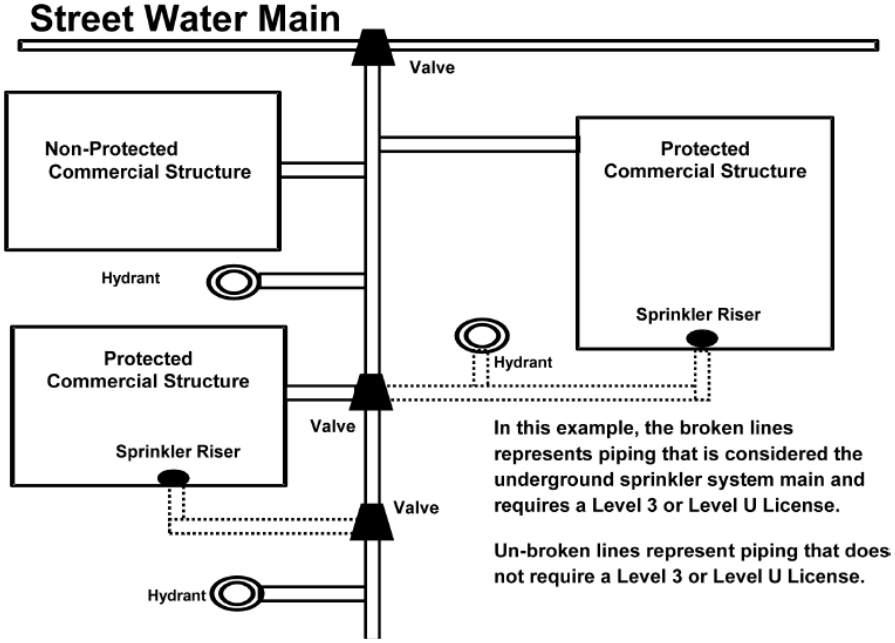
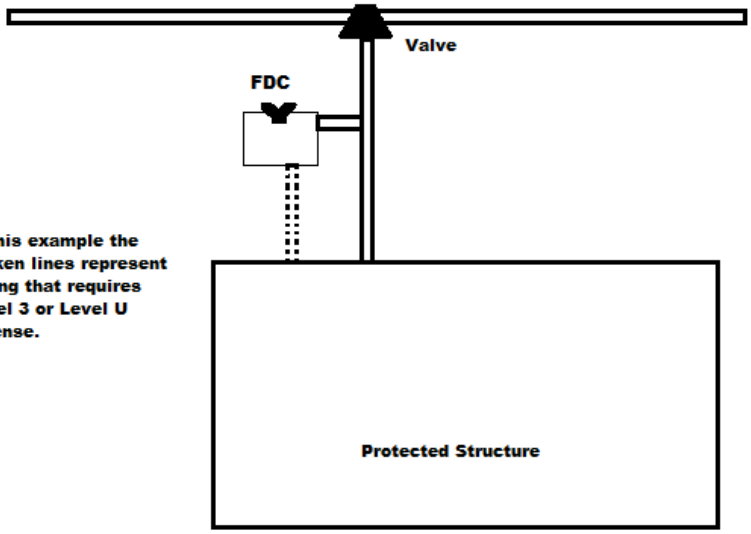
Commercial Example Street Water Main



In this example, the broken lines represents piping that is considered the underground sprinkler system main and requires a Level 3 or Level U License.

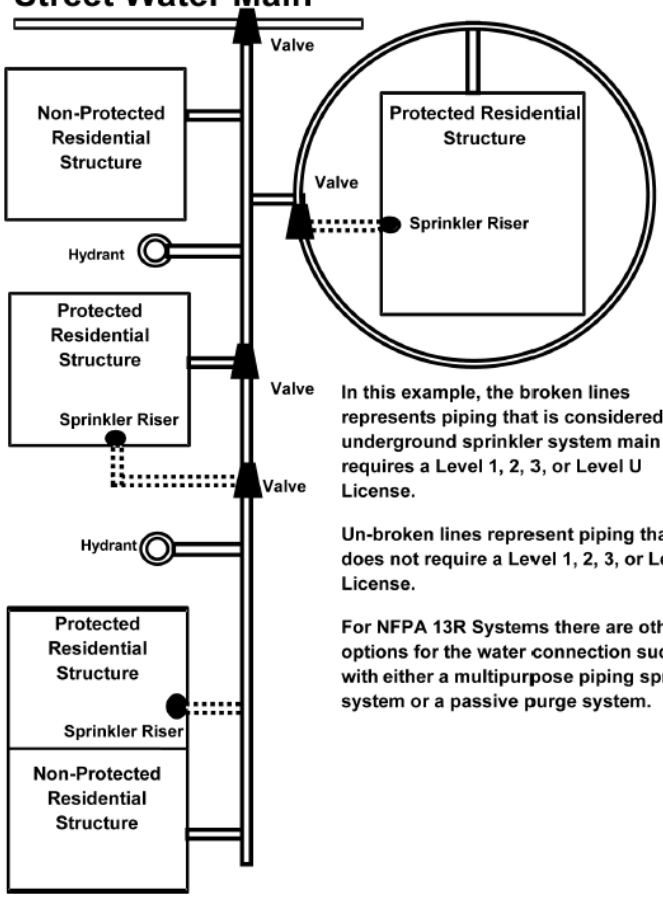
Un-broken lines represent piping that does not require a Level 3 or Level U License.

Street Water Main



In this example the broken lines represent piping that requires Level 3 or Level U License.

Residential Example
Street Water Main

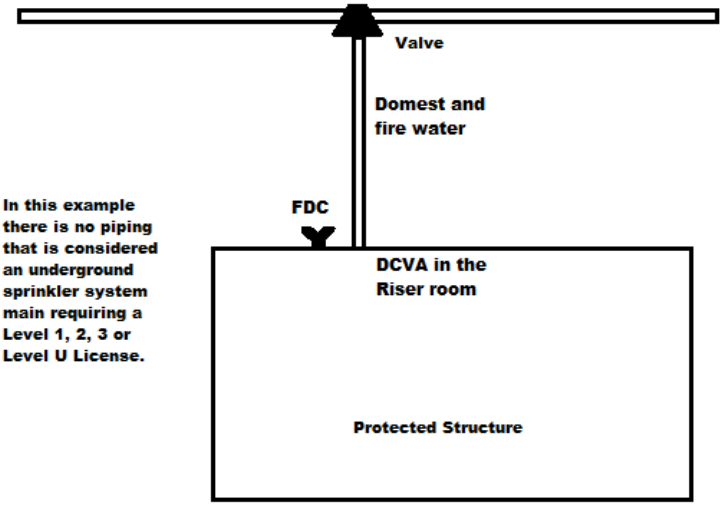


In this example, the broken lines represents piping that is considered the underground sprinkler system main and requires a Level 1, 2, 3, or Level U License.

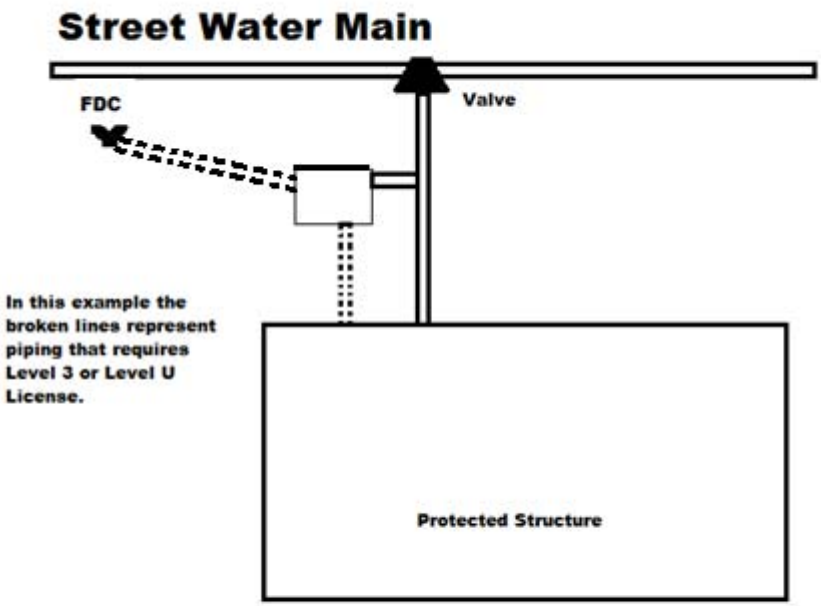
Un-broken lines represent piping that does not require a Level 1, 2, 3, or Level U License.

For NFPA 13R Systems there are other options for the water connection such as with either a multipurpose piping sprinkler system or a passive purge system.

Street Water Main



In this example there is no piping that is considered an underground sprinkler system main requiring a Level 1, 2, 3 or Level U License.



Street Water Main
