

SE 1st Street Improvement Project | Construction Ahead!

Construction on the first segment of the SE 1st Street Improvement Project, 164th Avenue to 177th Avenue, is expected to get underway in fall 2021.

This long-awaited transportation improvement project will provide a complete urban street system with sidewalks, bike facilities, stormwater enhancements, street lights and sound walls where designated. Overall, this project will improve safety, increase mobility, and enhance connectivity along the corridor. Project completion, including street paving, is currently anticipated in 2022.

The entire Southeast 1st Street Project reaches from 164th Avenue to 192nd Avenue. Planning and construction is being done in segments. We invite you to learn more about both segments by visiting the project webpage at www.cityofvancouver.us/FirstStreet. Updates will be posted on the project webpage as information becomes available. You can also sign up for email updates.
