

Required Detail Statement - Civil Plan Cover Sheet

City of Vancouver Public Utility Improvements: All materials and methods of construction and installation for water, sanitary sewer, storm water facilities, and erosion control measures shall conform to the most current edition of the City of Vancouver Engineering Services "General Requirements and Details for the Design and Construction of Water, Sanitary Sewer and Surface Water Systems"

Note should be modified as follows, to reflect locations outside of City utility service areas, grading-only projects, or locations outside the City limits:

If the Project is:	Then omit
Located in the Clark Public Utilities (CPU) Water Service Area	Water
Located in the Clark Regional Wastewater District (CRWWD)	Sanitary Sewer
A Grading-Only (SDP) permit	Water, Sanitary Sewer and Storm Water Facilities
Located within Clark County Jurisdiction	Storm Water Facilities and Erosion Control Measures

Standard Detail Drawings Inclusion\Exclusion Options: The required note incorporates the Standard Details by reference.

Civil plans have the following water and sewer detail options at the engineer's discretion.

- a) Exclude all Water and Sewer Standard Detail drawings, or
- b) Include All Related Water and Sewer Standard Details

Stormwater and Erosion Control Details: Selected Stormwater and Erosion Control Standard Details are required in all civil plan sets. Required details include E1.00A and B and others specified in the [Stormwater / Erosion Control Plan Checklist](#)
