

# **Operational Permit Application**Mobile Food Vehicles

www.cityofvancouver.us/departments/fire-department

International Fire Code as adopted by VMC 16.04 (Washington State Fire Code)

# **Permitting Requirements**

A single inspection is accepted by participating jurisdictions throughout Washington. This document is a standardized inspection recognized by multiple fire jurisdictions. You may receive a single inspection once every 12 months from any participating jurisdiction, and that inspection will be recognized by all

participating jurisdictions. This document must be posted in the vehicle at all times. For a list of participating jurisdictions please visit: www.wsafm.com/Food Trucks

**Local permits are still required.** You must contact the local fire department where you are vending and, if required, receive a food truck permit prior to operating in that jurisdiction. Many jurisdictions will reduce their permit fees if you have received a valid WSAFM Food Truck Inspection from another jurisdiction.

In the City Limits of Vancouver, an **operational permit** is required to operate a mobile food truck. This includes those vehicles that operate in a fixed location or relocate from location to location. Each mobile food vehicle permit shall be renewed on an annual basis or if the vehicle has any change from the approved inspection.

#### **Electronic Plan Standards**

#### File Naming Standards:

Electronic plans and documents shall be named as specified in the City of Vancouver <u>ePLANS</u> system: https://www.cityofvancouver.us/business/permits-licenses-and-inspections/eplans/

#### Acceptable File Types:

Plans, calculations, specifications and supporting documents shall be uploaded as a PDF file.

#### Plan Sheet Standards:

All plans shall be drawn to scale, as identified in the checklist, and each sheet shall state the scale and show a measurable scale on the page for measurement calibrations.

### **Document Orientation:**

All plans must be uploaded in "Landscape" format in the horizontal position with a north indicator. All other documents can be in "Portrait" format.

#### Stamped:

Where documentation contains a code analysis or engineering calculations, such documents shall be stamped by the design professional.

# **Permit Conditions**

The following is a list of WSFC requirements related to mobile food truck operations. Use this form to confirm that all applicable requirements are met. Non-applicable requirements can be left blank.

Genera	l:
	Mobile food preparation vehicles that are equipped with appliances that produce smoke or grease-laden vapors utilize LP-gas
	or CNG systems shall comply with WSFC 319.
	Cooking equipment that produces grease-laden vapors shall be provided with a kitchen exhaust hood in accordance with
	WSFC 606.
	All cooking equipment shall be protected by automatic fire-extinguishing systems in accordance with WSFC 904.13 and
	portable fire extinguishers shall be provided in accordance with WSFC 906.4 (319.4).
	Gas cooking appliances shall be secured in place and connected to fuel-supply piping with an appliance connector complying
	with ANSI Z21.69/CSA 6.16. The connector installation shall be configured in accordance with the manufacturer's installation
	instructions. Movement of appliances shall be limited by restraining devices installed in accordance with the connector and appliance manufacturer's instructions (319.5).
	Cooking oil storage tanks within mobile food preparation vehicles shall have a maximum aggregate volume not more than 120
	gallons and shall be stored in such a way as to not be toppled or damaged during transport (319.6).
Cooking	g Oil Storage Tanks:
	Metallic cooking oil storage tanks shall be listed in accordance with UL 80 or UL 142 and shall be installed in accordance with
	the tank manufacturer's instructions (319.7.1).
	Nonmetallic cooking oi storage tanks shall be listed in accordance with the tank manufacturer's instructions and shall comply
	with both of the following (319.7.2):
	1. Tanks shall be listed for use with cooking oil, including maximum temperature to which the tank will be exposed
	during use.
	2. Tank capacity shall not exceed 200 gallons per tank.
	Metallic and nonmetallic cooking oil storage system components shall include, but are not limited to, pipping, connections,
	fittings, valves, tubing, hose, pumps, vents and other related components used for the transfer of cooking oil (319.7.3)
	Normal vents shall be located above the maximum normal liquid line and shall have a minimum effective area no smaller than
	the largest filling or withdrawal connection. Normal vents are not required to vent to the exterior (319.7.5.1).
	Emergency relief vents shall be located above the maximum normal liquid line and shall be in the form of a device or devices
	that will relieve excessive internal pressure caused by an exposure fire. For nonmetallic tanks, the emergency relief vent shall
	be allowed to be in the form of construction. Emergency vents are not required to discharge to the exterior (319.7.5.2).
LP-Gas	Systems:
	The maximum aggregate capacity of LP-gas containers transported on the vehicle and used to fuel cooking appliances only
	shall not exceed 200 pounds propane capacity (319.8.1).
	LP-gas containers installed on the vehicle shall be securely mounted and restrained to prevent movement and each LP-gas
	container shall be manufactured in compliance with the requirements of NFPA 58 (319.8.2 and 319.8.3).
	LP-gas system piping, including valves and fittings, shall be adequately protected to prevent tampering, impact damage, and
	damage from vibration (319.8.4).
	A listed LP-gas alarm shall be installed within the vehicle in the vicinity of LP-gas system components, in accordance with the

## **CNG Systems:**

manufacturer's instructions (319.8.5).

		The maximum aggregate capacity of CNG containers transported on the vehicle shall not exceed 1300 pounds water capacity (319.9.1.1).				
		CNG containers shall be NGV-2 cylinders and shall be securely mounted and restrained to prevent movement. Containers				
		shall not be installed in locations subject to a direct vehicle impact (319.9.1.2 and 319.9.1.3).				
		Where CNG containers and systems are used to supply fuel for cooking purposes in addition to being used for				
		transportation fuel, the installation shall be in accordance with NFPA 52 (319.9.2).				
		CNG system piping, including valves and fittings, shall be adequately protected to prevent tampering, impact damage and				
		damage from vibration (319.9.3).				
		A listed methane gas alarm shall be installed within the vehicle in accordance with manufacturer's instructions (319.9.4).				
Mainte	nanc	2:				
		exhaust system, including hood grease-removal devices, fans, ducts and other appurtenances, shall be inspected and ned in accordance with WSFC 606.3 (319.10.1).				
	Fire	protection systems and devices shall be maintained in accordance with WSFC 901.6 (319.10.2).				
	LP-g	as container installed on the vehicle and fuel-gas piping systems shall be inspected annually by an inspection agency or a				
		company that is registered with the US DOT to requalify LP-gas cylinders, to ensure that system components are free from damage, suitable for the intended service and not subject to leaking (319.10.3).				
		containers shall be inspected every 3 years in a qualified service facility. CNG containers shall not be used past their				
	exp	ration date as listed on the manufacturer's container label. Upon satisfactory inspection, the inspection agency shall affix				
	a ta	g on the fuel gas system or within the vehicle indicating the name of the inspection agency and the date of satisfactory				
	insp	ection (319.10.3).				
NOTE: 7	his is	not intended to be an all-inclusive list. The WSFC requirements listed are intended to ensure that we have adequate				
informa	tion	to begin a review of the application. Additional information may be required.				
		that all applicable codes apply and that other regulatory codes may also apply. Errors and/or omissions on the plans				
and corrections from field inspections are the responsibility of the owner/contractor. All work is subject to compliance with City of Vancouver ordinances and laws of the State of Washington.
